

Reflection Task: instructions

This is a simple task to review your progress and your learning plan regularly together with the teaching team. This will help us ensure that you are on track, and that the teaching team is aware of any difficulty that you might face.

Complete and submit the reflection task. We provide a few prompting questions to help you. These questions ask about what you did, how you feel you are progressing, and whether you anticipate any issue. Please give a brief answer to the provided questions. Do not forget to update your learning plan if necessary, including the status (complete, started, or future).
